

Future To Do

Tips from Tony:

- chop image into chunks, use sequence number to retain order
- restful service
- Use jchart (?) for trainer data analysis

- Back end
 - Handle more users
 - Encryption for passwords and personal information
 - Save favourite gym locations
 - Save user's location
- Connect/ chat
 - Message multiple people
 - Store past messages
 - Message users while they are offline
 - Notify user of received messages opposed to bringing them directly into the app
 - Make your messages and received messages on opposite sides of phone
- Maps
 - Subscribe to service to update with new locations
 - Display gym:
 - Hours of operation
 - Prices
- Profile
 - add location
 - add favourite gyms
 - Higher quality images
 - Take saved photo from device
 - Have user select age from list of ages
- Find bayer Pager
 - only add profiles if nearby
 - RecyclerView to have continuous swiping
- Personal Trainer
 - Offer different body specific workouts
 - Track improvement
 - Make audio to:
 - Encourage climber
 - Explain instructions
 - Update on remaining time
- App Overall
 - Make the app look more professional

- Better encapsulation
- Make splash screen smoother
- Make an iOS version
